## Description

Poly Strip 100 is a highly effective, water-free remover for organic coatings. Particularly powerful with powder coatings, Adhesives, sealants and plastics. The cleaning is intensive with thick layers, even at room temperature.

#### Chemical characterisation

Anhydrous, high-boiling solvent mixture with a high flash point.

# Classification according to Regulation (EC) No.1272/2008 [CLP]

Acute Tox. 4 ; H302 - Acute toxicity (oral) : Category 4 ; Harmful if swallowed.

Skin Irrit. 2 ; H315 - Skin corrosion/irritation : Category 2 ; Causes skin irritation.

Eye Irrit. 2 ; H319 - Serious eye damage/eye irritation : Category 2 ; Causes serious eye irritation.

### Transport information

ADR : -

# Water hazard class (Classification according to AwSV)

Water hazard class : 1 (slightly hazardous to water)

## Labelling for contents according to regulation (EC) No. 648/2004

< 5 % cationic surfactants

< 5 % non-ionic surfactants Contains: BENZYL ALCOHOL

#### Safety equipment

| Eye / Face protection:  | suitable safety goggles acc. EN 166       | In case of splash                                   |
|-------------------------|---|---|
| Hand protection:        | suitable gloves type EN 374               | In case of possible skin contact                    |
| Respiratory protection: | Combination filtering device DIN EN 14387 | In case of exceeding exposure limit values; Type: A |
|                         |   |   |

#### Application

Poly Strip 100 is suitable for immersion baths with and without temperature, for ultrasonic baths and for use in paint stripping systems. The cleaner is already effective at room temperature, the optimal cleaning temperature is between 40 ° C and 55 ° C and should not exceed 70 ° C.

Important: Not suitable for adjusting the viscosity of varnishes and paints.

The medium is compatible with PTFE, PP, PE. Other materials must be checked on a case-by-case basis. Due to different processing requirements, no binding and generally applicable information and recommendations can be made. It is recommended to always carry out appropriate preliminary tests. We reserve the right to make technical changes and to carry out further developments.

# Storage

Keep container tightly closed. Keep/store only in original container. Protect against sub-zero temperatures. Optimized storage temperature is between 5 °C up to 35 °C. The product is storable in closed original packaging for at least 12 months. Starting date is the date of production.

Taxable VOC (CH):

## Storage class (acc. TRGS 510): 10

## **Disposal advices**

The waste codes are recommendations based on the schedule use of this product. Owing to the user's specific conditions for use and disposal, other waste codes may be allocated under certain circumstances.

| Waste code acc. | EWC/AVV for | r unused product |  |
|-----------------|-------------|------------------|--|
|-----------------|-------------|------------------|--|

20 01 29\* Detergents containing dangerous ingredients.

Waste code acc. EWC/AVV for packaging15 01 02plastic packaging

Contaminated packaging must be emptied of all residues and, following appropriate cleaning, may be sent to a recycling plant. Uncleaned packaging must be disposed of in the same manner as the medium.
